

Department Name: Computer Science & Engineering

Subject Code: UE17CS355

Subject Name: Web Technologies II Laboratory

InternKit

Team Members:

- Vishnu S Murali : PES1201701624
- Rishi Ravikumar : PES1201700754
- Aniket Kaulavkar : PES1201700095

Project Description

The web portal is intelligent to convey students the probability of acceptance to a particular internship he or she as posted with respect to the skills the student has and the projects he or she built.

The online portal provides the employees to post any internship offers they want to post and students can apply to the listed internships that are posted.

Opportunities to connect to employees of different companies for internships according to the skills the students have

Technologies Used:

React JS

1 out of 3 React JS

For running dynamically rendered components of the UI

Front-end

React framework

React JS

Flask on python

Siamese LSTM with
Word Cloud

Title:

InternKit

An online platform to connect employers and students for internships.

Back-end

Flask app with jwt enabled and sqlite3 used as database to store the data.

30% Flask app on python

Serving the apis via flask app for different functionalities that the website offers. It uses REST architecture and periodic refresh techniques to connect to the frontend

SQLite3
SQL
database
engine

30%

Probability acceptance to an internship

Intelligent Component

Siamese LSTM integrating it with word cloud features for text similarity check

MACHINE LEARNING
